## *About Us*

**Leren Curriculum** has been providing schools with quality books and workbooks since 1986.

**Leren Curriculum** creates and updates new titles every year. Titles cover a broad range of categories, including: phonics and readers, writing and grammar, language and handwriting, math, children's picture books and award-winning young adult fiction.

Books are valuable learning tools for individuals and academic institutions. By reading books relevant to subject areas studied in school, students are enabled to gain a better understanding and develop a deeper knowledge.

Our texts also enable students to sharpen and develop essential skills such as reading and visuals comprehension, communication, and phonetics interpretation. They help provide the reader with social tools to gain an understanding of and appreciation for people of other cultures, broadening one's skills in dealing with others and being sensitive to their unique perspectives and various world views.

**Leren Curriculum** is headquartered in New York, and is a proud vendor of the NYC Department of education programs.
